

## Organic Control of Slugs and Snails

---

### Tried

- Chooks/ducks
- Regular clean-up
- Handpicking
- Barriers (tried) - crushed eggshells, hair, coffee grounds, petroleum jelly, cloches
- Yeast trap (don't drink beer and too expensive just to bait snails and slugs)
- Lures and traps (under plant pots, old wood, etc)
- Organic pellets (multiguard - iron based, breaks down to soil nutrients)

---

### Untried

- Barriers (untried) - diatomaceous earth, lime, wood ash, wood shavings, sawdust, copper
- Carnivorous native snails
- Lures and traps (inverted orange, grapefruit rinds, old cabbage leaves, dry dog/cat food)
- Escar-Go (liquid copper)
- Vinegar and water spray
- Mint/sage mulch
- Cornmeal (dessicates)
- Ammonia spray (<http://deepgreenpermaculture.com/diy-instructions/strange-brew-homemade-garden-sprays/>)
